

I am writing to comment on how K-LOVE radio has affected my life and my community. K-LOVE radio is a clean and non-offensive radio station that promotes a sense of well-being among its listeners. I do not listen to other local radio stations because they are offensive and promote hate towards people in the community and state. I am encourage by the positive message that K-LOVE portrays and learn about living life positively through their educational teachings on how to be a better parent, friend, spouse and/or sibling.

If K-LOVE were to go off the air to be replaced by a LPFM station, I would be most likely be without encouragment, without a positive influence and would be inudated with a negative, hate message towards my community and all of mankind. I would quite listening to the radio all together!

K-LOVE is definitely in the best interest of any community it is broadcast in. Not only do they promote resect and love towards mankind, but the are commmercial-free, which allows us a relief from being constantly inudated with materialist influences.

Since K-LOVE is listener supported, it also promotes a sense of strong community, because one listener alone cannot finance the station. It takes a number of people, making a commitment, to support something we all believe in and want to keep in our lives. K-LOVE can, and does, help a lot of people by providing services, like a help hotline, for those who are in need. If they hadn't heard it on K-LOVE, these people may not have been able to get the help they so desperatley need. Please do NOT let LPFM to take priority over FM translator service.
